Snus is a common alternative to cigarettes in Scandinavia

¹ Raw data mainly contain Norwegian names, English names are added to final data sets

² Material types are assigned based on what is considered to be the dominant type (gl = glass; me = metal; pa = paper; pl = plastic; ru = rubber; wo = wood; ot = other)

³ Items are classified into likely origin types on two different levels, only 'wide' is used in analyses (i.e. categories describe a wide range of items)

⁴ In early ears the number was collected, from 2014 onwards only categories (1 = 0-50, 2 = 50-100, 3 = >100) were collected. The latter is not included in the analyses.
